he replied that he did not know that a bond had yet been given.

"The property of the company," said he, "was recently experted in the interest of an eastern combination, and we were asked to place a price upon it. At the last meeting of the directors we decided to let the property go for \$250,-600 under certain conditions. The figure I name was for the Trapper's Pride and all other holdings of the company at Gold mountain, and the would-be purchasers were advised of the decision reached. It may be that our manager has received advices that the terms named have been accepted, and from the information you have received I reasurer of the exchange at the first he required to expend \$10,000 in develop-ment upon the property during the present year." Norton was therefore named to fill that position.

small streaks of ore.

According to a statement which comes from the Boston end of the line, the United States Mining company will this year pay off its floating and bonded indebtedness and pay a substantial dividend to the shareholders as well. Judging from the manner in which they are getting down to work at the new smelter, the promises of the management will be made good without trouble.

During the intervals of sunshine yesmade good without trouble.

During the intervals of sunshine yesterday the high peaks and ridges along the Wasatch range between here and Alta presented a beautiful appearance. The light snows which have fallen during the past few days were being swirled high in the air by the strong winds, and great combs were being formed along the mountain summits. The traveler through the canyons during the next few weeks will need to move cautiously, as the danger from slides will be very great. 5.321/2 1.58

New York, Jan. 27.—Reports from Bohemia show, according to a dispatch to the Times from Vienna, that the czech extremists are prosecuting and extending a violent campaign against the comparative modern attitude of the younger czechs in the recent language negotiations. The point of the campaign is that the radical tail wags mode moderate dogs and that the younger czechs will scarcely venture to oppose the radical vehemence. Another form of government by the eaergency paragraph of the constitution seems probable with the consequences costing Austria dear.

In the meantime the Poles have profited by the obstruction in the sugar commission to get concessions from the czechs and Germans alike regarding the sugar allotment bill.

RING WORM AND DANDRUFF.

They Are Each Caused by a Pestiferous Germ.

Ring worm and dandruff are somewhat similar in their origin; each is caused by a parasite. The germ that causes dandruff digs to the root of the hair, and saps its vitality, causing falling hair, and finally, baldness. Without dandruff there would never be baldness, and to cure dandruff it is necessary to kill the germ. There has been no hair preparation that would do this until the discovery of Newbro's Herpicide, which positively kills the dandruff germ, allays itching instantly and makes hair glossy and soft as silk.
